"The support, exposure and opportunity you get is invaluable."

As an apprentice you will be mentored in core business skills, such as problem-solving, innovation and how to communicate and collaborate with others to make a real difference in your role. You will be a part of the team and Nestlé from day one, and be encouraged to explore your interests as you rotate through different aspects of manufacturing and work with new processes and equipment.

The emphasis here is always on learning by doing, but there's also a chance to experience a bit of student life with our learning partners in Lincoln. Here you'll meet other Nestlé and Cereal Partners manufacturing apprentices from all over the country and friendships and professional relationships that will be useful in your career development.

Deadline: 20th February 2023
Requirements: Maths and English Language
GCSE, with actual or predicted grades at 9-4
