SUPPLY CHAIN APPRENTICESHIP

"The support, exposure and opportunity you get is invaluable."

As a Supply Chain Apprentice, you'll focus on the end-to-end process that starts with raw ingredients and ends in Nestlé products on the shelves. You'll learn how we respond to challenges like Brexit and skills shortages and about how we adapt to become more resilient, efficient and sustainable.

Supply chain is a huge, diverse part of our business. Improving it requires the input of diverse perspectives. That's why we want people from all backgrounds to join us here. It's also why we'll encourage you to be yourself—so that you can make the most original and valuable contribution you can.

Over two-and-a-half years and three rotations, you'll gain experience of the full supply chain process from negotiating with suppliers of raw materials to liaising with factories and arranging dispatches with hauliers. You'll take on real-life projects that you'll be accountable for. Sure, there will be expert support whenever you need it, but you'll be making your own decisions.

Deadline: 20th February 2023

Requirements: You'll also need 5 GCSEs (or equivalent) including Maths and English, with actual or predicted grades at 9–4
